CLADDING & ROOFING LTD.

GEORGE WATSON COLLEGE
SLATE WORK CASE STUDY

After several years of the Rugby Pavilion not being used the College decided to bring it back to its former glory. We were delighted to be awarded the contract to re-new the roof covering to allow a full refurbishment internally to take place without any water ingress problems.

The client wanted a more robust system with a similar appearance. We stripped the existing red felt shingles down to the timber sarking and installed a Redland Rosemary tiled system complete with breather felt and timber batten.
